SUBJECT: FORT CALHOUN STATION - NRC MATERIAL CONTROL AND ACCOUNTING
PROGRAM INSPECTION REPORT 05000285/2007401

Dear Mr. Ridenoure:

On May 4, 2007, the U.S. Nuclear Regulatory Commission (NRC) completed the material control and accounting (MC&A) safeguards program inspection at your Fort Calhoun Station. The enclosed inspection report documents the final MC&A inspection results, which were discussed with Mr. D. Bannister and members of your staff during the exit meeting.

The inspection examined activities conducted under your license as they relate to safety, security, and compliance with the Commission's rules and regulations and with the conditions of your license. The inspectors reviewed selected procedures and records, observed storage of special nuclear material in the spent fuel pool, and interviewed personnel. Areas examined during the inspection included physical inventory and accounting records.

No findings of significance were identified.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter, will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS).
