Dear Mr. Bronson:

On February 18, 2011, the U.S. Nuclear Regulatory Commission (NRC) completed a security baseline inspection at your James A. FitzPatrick Nuclear Power Plant (Fitzpatrick). The inspection covered one or more of the key attributes of the security cornerstone of the NRC's Reactor Oversight Process. The enclosed inspection report documents the inspection results, which were discussed on February 18, 2011, with Mr. Michael Reno, Maintenance Manager, and other members of your staff.

The inspection examined activities conducted under your license as they relate to security and compliance with the Commission's rules and regulations and with the conditions of your license. The inspectors reviewed selected procedures and records, observed activities, and interviewed personnel.

As a result of this inspection, no findings were identified.
