Dear Mr. Pacilio:

On June 17, 2011, the U.S. Nuclear Regulatory Commission (NRC) completed a security baseline inspection at your Dresden Nuclear Power Station, Units 2 and 3. The inspection covered one of the key attributes of the Security Cornerstone of the NRC's Reactor Oversight Process. The enclosed inspection report documents the results of this inspection, which were discussed on June 17, 2011, with Mr. S. Marik, Station Plant Manager, and other members of your staff.

The inspection examined activities conducted under your license as they relate to security and compliance with the Commission's rules and regulations and with the conditions of your license. The inspector reviewed selected procedures and records, and interviewed personnel.

Based on the results of this inspection, no findings of significance were identified.
