“INSPECTION OF IMPLEMENTATION OF INTERIM CYBER SECURITY
MILESTONES 1-7,” INSPECTION REPORT 05000313/2015405
AND 05000368/2015405

Dear Mr. Browning:

On May 14, 2015, the U.S. Nuclear Regulatory Commission (NRC) completed a security temporary instruction inspection at your Arkansas Nuclear One facility. The inspection covered the implementation of interim milestones associated with your cyber security program, as outlined in your approved cyber security plan and described in Temporary Instruction 2201/004, “Inspection of Implementation of Interim Cyber Security Milestones 1-7,” Revision 1. The enclosed inspection report documents the inspection results that were discussed on May 14, 2015, with you and other members of your staff.

The inspection examined activities conducted under your license as they relate to safety and compliance with the Commission’s rules and regulations and with the conditions of your license. The inspectors reviewed selected procedures and records, observed activities, and interviewed personnel.

NRC inspectors documented four violations of very low security significance in this report. These findings involved violations of NRC requirements. Inspectors also documented one licensee-identified violation, which was determined to be of very low security significance. This violation is listed in Section 4OA7 of this report. The NRC is treating these violations as non-cited violations consistent with Section 2.3.2.a of the Enforcement Policy. These issues were discussed and reviewed during a Security Issues Forum Panel meeting conducted on May 13, 2015. The Security Issues Forum Panel review concluded that, although these issues

Consistent with the NRC Memorandum, when you complete and close corrective actions associated with these violations, you are requested to provide written notification to the NRC's regional office as to the method and date of closure of the corrective actions for the identified violations.

If you contest the violations or significance of these non-cited violations, you should provide a response within 30 days of the date of this inspection report, with the basis for your denial, to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, DC 20555-0001; with copies to the Regional Administrator, Region IV; the Director, Office of Enforcement, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; and the NRC resident inspector at Arkansas Nuclear One.
